

ICD-10 Updates for 2025 (effective October 1, 2024)

Below is a list of ICD-10 coding changes that will take effect on October 1, 2024. These are codes that are most commonly seen in chiropractic and other physical medicine practices. This is not an exhaustive list of all the changes that are scheduled to take place but should account for the major changes seen in your practice.

The most striking features will be the **increased level of specificity** that will be added, especially to those codes that are being deleted.

Please make note of this and take steps to update your diagnosis list in your EHR, unless this has been done for you with a recent software update. Also, be sure to update any paper versions of your diagnosis lists to reflect these changes.

If you have any questions, please contact New Compass Coaching and Dr. Jeff Lewin directly at drjefflewin@gmail.com
